Senior Product Designer with 20+ years of experience across product design, UX/UI and design systems, including extensive experience at Condé Nast. I design digital products and scalable systems for global brands including Vogue, Wired, GQ and Glamour, combining strong visual craft with systems thinking and product strategy. Experienced in complex publishing platforms and AI-assisted editorial tools, working closely with product and engineering teams from concept through delivery.

Core Skills

- AI-assisted Product Design & Development

Tools & Technologies

- Figma
- Adobe Creative Suite – Illustrator, Photoshop, InDesign
- Cursor / AI-assisted development
- GitHub
- HTML / CSS

Professional Experience

Condé Nast Global, London

Senior Product Designer, Application Platform
2018 – 2026

- Led product design across Condé Nast's global application platform, shaping scalable experiences used across 10+ international brands and products.
- Worked closely with product managers, engineers and editorial teams to define requirements, solve complex UX challenges and take products from discovery through delivery.
- Drove greater consistency across global products by establishing shared design principles, documentation and more structured ways of working between design and engineering.
- Balanced global platform requirements with the distinct identities and editorial needs of brands including Vogue, Wired, GQ and other Condé Nast titles.
- Helped improve the adoption and governance of shared design practices across distributed teams, enabling designers and developers to work more consistently.
- Contributed to the evolution of internal publishing tools and workflows, identifying opportunities to simplify complex editorial tasks and improve efficiency.

Selected Projects:

Verso Design System

Led design-system work across components, patterns, tokens and themes, creating a scalable foundation for multiple Condé Nast brands and products.

AI Editorial Tools

Designed AI-assisted editorial tools including LLM-generated summaries and content-planning workflows, simplifying complex editorial tasks.

OneNav

Designed shared navigation patterns to improve information hierarchy, user journeys and consistency across products.

Condé Nast Britain, London, UK

Senior Designer
2012 – 2018

- Designed and delivered responsive UX/UI experiences for major publishing brands including Vogue, Wired, Glamour and Tatler, reaching global audiences.
- Led digital design initiatives across web, mobile and digital editions, translating editorial requirements into engaging product experiences.
- Collaborated directly with editors, art directors, product teams and developers to balance editorial vision, user needs and technical requirements.
- Helped establish UX processes within the digital department, improving design workflows and collaboration.
- Contributed to the transition toward responsive, mobile-first digital experiences across Condé Nast brands.

Condé Nast Britain, London, UK

Designer

2010 – 2012

- Designed digital and commercial experiences across Condé Nast's portfolio of publishing brands.
- Developed concepts, storyboards and visual executions for editorial and commercial projects.
- Created digital campaigns, microsites, homepage takeovers, email experiences and rich-media advertising.
- Supported revenue-generating commercial initiatives while maintaining the visual standards of individual brands.

Earlier Experience

Digitronix, Huddersfield, UK

Designer

2008 – 2010

Delivered web and visual design projects for a range of clients, working collaboratively across design and production teams.

AKQA, London, UK

Designer

2007 – 2008

Contributed to client-facing digital design projects within multidisciplinary teams in a fast-paced agency environment.

Artograph, Manama, Bahrain

Designer

2001 – 2005

Delivered branding, visual design, layout and digital work across a diverse client portfolio.
